Major Features:

It's not just a single player survival horror game but a **group of adventures** trying to survive a night on Ravenhill.

The base game is **free** to download and play! The game includes an in-game shop that offers **cosmetic items** for your adventures.

You can buy or earn new adventures that will **unlock new challenges** that you and your friends can then face during the game. Just like if you buy new expansion to a board game, only one person has to buy it among friends.

You can play at any time! You don't have to wait for friends to play. You have the option to be teamed up **with friends and/or random players** around the world.

Huge replay value! Every time you play, the game independently randomizes the house, events, items, and horrors based on adventures present and level of the adventurers.
